WORK EXPERIENCE

Analyst, Merkle DGS

Jun 2022 - Present

- Led the development and programming of surveys for international clients using tools like Confirmit, Decipher, Qualtrics, and Recollective, ensuring seamless project execution and client satisfaction.
- Managed end-to-end project operations, including client communication, sampling management, data analysis (using Ascribe), and generating actionable insights through both quantitative and qualitative research methodologies.
- Oversaw high-value projects (over \$100K in revenue), defining scope, reviewing project deliverables, conducting feasibility analysis, and ensuring timely, budget-conscious project delivery.
- Coordinated with cross-functional teams, created project plans, and optimized costs through vendor negotiations, while also addressing technical challenges and maintaining project frameworks.
- Developed and maintained SOPs for compliance, validated survey data quality, and streamlined daily operations, resulting in improved project efficiency and enhanced internal processes.

Web Development Intern, The Sparks Foundation

Jun 2021

- Developed and hosted a simple website with integrated payment gateway functionality, enabling seamless online transactions.
- Employed HTML5 and CSS3 for website design and utilized Razorpay Gateway to facilitate secure payments. Utilized the 000Webhost platform for hosting to ensure reliability and accessibility.
- Implemented features for invoice generation and automated email confirmations upon successful payment transactions.

EDUCATION

Bachelor of Engineering in Computer Engineering

2018 - 2022

University of Mumbai

Country: India | **Final pointer:** 9.56/10 | **Number of credits:** 212

Thesis: SignGenix - Speech to Sign Language Converter

- Data Structures and Algorithms, Programming Languages (Python, Java, Structure Programming Language), Operating Systems, Database Management, Software Engineering.
- Applied Mathematics, Natural Language Processing, Machine Learning, Artificial Intelligence and Soft Computing, Distributed Computing.
- Cryptography and System Security, Cybersecurity and Laws, Human-Machine Interaction, and Mobile Communication and Computing.

Higher Secondary School Certificate

2017 - 2018

Maharashtra State Board of Secondary and Higher Secondary Education, Pune

Country: India | **Final percentage:** 90.15%

- Main subjects: Physics, Chemistry, Mathematics, and Biology

Secondary School Certificate

2015 - 2016

Maharashtra State Board of Secondary and Higher Secondary Education, Pune

Country: India | **Final percentage:** 91%

KEY PROJECTS

Major Project - SignGenix (Speech to Sign Language Converter)

- Addressed the communication challenges faced by the mute community, by developing a platform to communicate effectively, bridging the gap between individuals who understand sign language and those who do not, thereby empowering them to interact more seamlessly with others.

Link: <https://github.com/JB14forever/SignGenix>

Frooty (Fruit Prediction App)

- The project focuses on image classification and prediction using CNN models, specifically for fruit recognition. Frooty offers a fast, lightweight, and user-friendly interface compatible with Android devices. Potential to expand functionality to provide health advice on fruits.

Super Manager

- A website designed to streamline policy management for insurance agents. Features include a centralized policy repository and an intuitive dashboard to enhance agent performance and boost premium production. Personalized access levels ensure data security, with user authentication via email verification and token generation.
